We create an event within your event—making high-quality instant portraits of your guests.

Guests pose in front of our studio backdrop, a natural outdoor setting or custom-made backdrop.* We print the portraits on-site and place them in our beautiful standard ebony folder. Portraits are set out on a table for guests to pick up at their leisure, or before they leave the event. Many different styles of frames and folders are available. These can be purchased from Michael Spear Photography for an additional fee. Host may purchase frames and/or folders from an outside vendor provided they will accommodate a 4x6 print. Typically, these portraits are made during your event’s appetizer/cocktail hour, or at the beginning of your event so that all portraits can be printed by the end of the event.
